

THE MACLEOD TIMES

John Dillingham, Publisher
S. Dillingham, Editor and Manager
A weekly newspaper printed and published at Macleod, Alberta (every Thursday)
(Independent in Politics)

Subscription price (in advance)
Per year \$2.00
If not paid in advance \$2.50
Foreign \$4.00
WEEKLY CIRCULATION 1,450
Created in a prosperous town of 1,700 population and in adjacent prosperous farming district.

THURSDAY, OCT. 17th, 1929

ALBERTA HIGHWAYS ARE MARKED BY MOTOR ASSOCIATION

Marking of two thousand miles of automobile roads north of Red Deer has been undertaken by the northern

division of the Alberta Motor Association. The southern branch has been working for some time on proper marking of highways in that part of the province, so that next season, with its increased car traffic, there should be a large percentage of the main and secondary highways of this province fully marked, something that will be of lasting credit to the Alberta Motor Association.

In the north, much good work has been done by J. A. McNeill, manager of the northern division of the Alberta Motor Association. There has been considerable marking of the Highway from Edmonton to Viking. Every trail north of Hayer, even though it is a plain marked R or L, will be as every cross-road being marked with a straight ahead sign. The Green Trail from Macleod to Athabasca has been completed as well as the Black Trail from Edmonton to Athabasca.

Fred R. Brown has been directing the work of road marking in southern Alberta and splendid results have been obtained there for the year. It is realized that a large percentage of Alberta's tourist traffic enters from the Montana gateway.

PRESENTATION TO MRS. RAMON BOTTOM AT MACLEOD ROYAL PURPLE MEET

At the regular monthly meeting of the Royal Purple Order, held at the Macleod Lodge on Wednesday, October 9th, at which there was a large attendance, Mrs. J. R. Ramonbottom was presented with a handsome silk bedspread, a small token of appreciation from the members on the occasion of her leaving Macleod for Field, B. C., where the family will reside in the future.

Mrs. Ramonbottom is a charter member of the Macleod Lodge and has been a very active worker in all lodge activities, she was the first Honored Royal Lady of the lodge and was largely instrumental in the organizing and formation of the lodge.

Her bright and cheery presence will be greatly missed in the meetings, and the members could not but feel that the presentation was a fitting tribute to her. The presentation was made by Mrs. V. R. Baker, Honored Royal Lady, who expressed the regret of the members at losing Mrs. Ramonbottom and spoke of the pleasure it had been to her to associate with the members since the lodge was started.

She would always look back with pleasure to her stay in Macleod and especially with her connection with the Royal Purple Lodge.

At the close of the meeting all the members adjourned to the home of Mrs. Baker, where the balance of the evening was spent in games and in social manner. Dainty refreshments were served during the evening.

BRITISH DIRIGIBLE HAS TRIAL FLIGHT

Cardington, Eng., Oct. 14.—The giant British dirigible R-101, largest afloat in the world, left its mooring mast at 11:30 a. m. for its first trial flight. She carried a crew of 38 and 14 passengers.

Great crowds cheered as the airship started its flight, commanded by Major G. H. Scott, the first man to cross the Atlantic in a lighter than air machine. The guests included Sir John Huggins, representative of the Empire Air Council. Hot balloons were to be visible ahead.

"My instructions are to fly in air and to test the ship in every way possible," Major Scott said. "The probability is that our maiden trip will be a half mile away. There is not very much to expectations in performance."

The dirigible was taken from its hangar Saturday and moved to the water in a half mile away. There is not very much to expectations in performance.

The R-101 is 730 feet long and 122 feet in diameter. Under the contract when the ship was laid down, it was to have a speed of 70 miles an hour at 5000 feet with a cruising speed of 63 miles an hour. At this cruising speed, it was estimated the airship should be able to fly in still air a distance of some 4000 miles without refueling, with a normal commercial load.

The R-101 is fitted with engines using a heavy oil, the purpose being to reduce the fire hazards attendant upon the use of gasoline. Engineers are particularly interested in determining the degree of efficiency reached by these motors.

The airship is designed to carry one hundred passengers, baggage, and ten tons of mail. It has a dining room capacity of seating fifty persons at a time.

THE COMBINE HARVESTER IN THE WEST

The use of the combine harvester which both cuts and threshes the grain has increased at a very rapid rate in the Western Province and particularly in Saskatchewan. According to officials of the Swift Current, Saskatchewan, Experiment Station, who have been observing harvesting operations with the combine for seven years there were more than 2300 combines used in Saskatchewan last year. In Alberta more than 1000 were used and in Manitoba a considerably smaller number. The opinion of a large number of the operators of these machines was secured by J. G. Tugart, and J. K. MacKenzie of the Swift Current Station, who have prepared a booklet on their observations that has been issued as Bulletin No. 118 of the Department of Agriculture at Ottawa.

The output for these machines is stated to represent about 10,000,000 bushels. Among the 4000 old machines used almost one-half operated the windrow harvester and pickups, which side fully one and one-half million dollars to the cost of the equipment. Out of 275 combine users questioned, 41% used the straight combine, 36.5% divided their rating between the straight combine and use of the windrow harvester and pickup, while 17% used entirely the windrow harvester.

The information gathered from these users indicates that the windrow harvester has undoubted advantages in harvesting side and fall crops, and also when conditions such as late seasons, heavy winds and rolling land are encountered. Some

of the operators interviewed held the view that the combine is a profitable investment only when the windrow harvester is used. Others held a different opinion, believing that the use of the straight combine shows a profit, particularly when a large acreage has to be harvested. A small number who had used the combine were giving them up and returning to the use of the binder and separator. These, however, were found to be located on rolling and park land areas where harvesting with the combine was accompanied by some difficulties.

AIR CIRC. FINDS RAMON NOVARO AT HIS BEST—M. G. SUPERB PICTURE, "THE FLYING FLEET," WITH ITS BACKGROUND OF N. A. V. AVIATION, BRINGS NEW THRILLS TO FILMS—FRIDAY AND SATURDAY

Ramon Novaro, beloved of screen fans the world over, is one of the most thrilling film plays of his career. It is "The Flying Fleet," Metro-Goldwyn-Mayer's contribution to the motion picture art.

It is splendidly done and affects some of the best "air shots" that have yet been seen on the screen. It also deals with a new angle of aviation, that is new as far as pictures are concerned, for it is a story of thrilling flights above the sea.

What gave this reviewer the greatest thrill was the wreck of the airplane carrier, mother ship of the eagles of the fleet. But that is by no means the only thrill. There are parachute jumps from flying planes, sensational maneuvers in the skies, thrilling first flights of student aviators, a few inevitable disasters—enough to make it real—a lot of wrecked planes, tossing helplessly in a mountainous sea, an air battle, battle maneuvers on an air field, the Pacific—in fact, there are thrills too numerous to mention, enough to hold an audience breathless and spellbound.

But the life "The Flying Fleet" so completely out of the ordinary class of aviation pictures is the fact of its entertaining and gripping story. There is as much more to it than air stunts, thrilling maneuvers. It has a tender love story combined with a great epic of friendship.

Friendship between two youths that is tested to the very core, one that involves their honor and a great sacrifice.

Ramon Novaro gives a splendid portrayal.

Manufacturing in Canada has increased 700 per cent in the last 30 years, according to the industrial department of the Canadian Statistical Bureau.

MRS. O. J. WOOD FIRED BY MRS. R. M. REID AT MACLEOD

Mrs. R. M. Reid, 10th Street, Macleod, gave a special afternoon bridge party on Thursday in honor of Mrs. O. J. Wood, who is shortly returning to Lethbridge, where Mr. Wood will in future be located having been appointed superintendent for South Alberta of the London Life Insurance Co.

The rooms were beautifully decorated with yellow maras for the occasion and a delightful afternoon was spent by the large number of guests who were present to bid adieu to Mrs. Wood.

The prize winners for the afternoon were Mrs. J. W. McDonald and Mrs. Kirk and a special prize was presented to the guest of honor.

Delicious refreshments were served by the hostess, who was assisted in serving by Mrs. Swinerton and Mrs. Armstrong.

In the evening Mrs. Reid gave an afternoon bridge party, when Mrs. R. Hamilton and Mrs. Holmset were the successful prize winners and refreshments were served, the same ladies assisting the hostess.

INCREASING THE VALUE OF CANADIAN MUSKRAT RESOURCES

The increased demand for muskrat pelts, the consequent rise in price and the marked decrease in the muskrat supply are the main reasons for the increasing interest and widespread demand for information as to the economic possibilities of raising this fur-bearing.

To meet this demand and to increase the value of Canada's muskrat resources, the Department of the Interior, Ottawa, through its Natural Resources Intelligence Service, has prepared and issued a booklet entitled "The Muskrat, a Canadian Fur Resource."

The purpose of the booklet is to make possible a wider knowledge of the essential facts necessary for raising muskrat under conditions in their natural habitat or in pens.

Canada, owing to climatic and other favorable conditions, is particularly adapted for the production of muskrat and muskrat pelts, and as well as thousands of acres of muskrat areas on which they may be prosecuted. The development of muskrat and muskrat pelts as a resource and other more or less unexploited areas on which they may be prosecuted.

This booklet on the muskrat will be sent on request to the Natural Resources Intelligence Service, Department of the Interior, Ottawa.

LIGHTS VIBES' NO LIGHTS FOR LAYING PULLETS

(Experimental Farm Notes)
In view of the fact that brood eggs are nearly always a higher price during the winter season than during the summer, many poultry men have been interested in the possibility of increasing winter egg production by the use of artificial light.

At the Dominion Experiment Station, Kapuskasing, Ontario, an experiment has been conducted for a period of five years in order to obtain some data on this subject. The experiment covered a period of six months each year from November 1 to April 30, during which time the electric lights were turned on at four o'clock in the morning and remained on until daylight. One hundred pullets were used. These were divided equally as to weight, general development and breeding into two groups of light and dark conditions were made similar except that the one pen had these extra hours of light to work.

Over a five-year period the pen on lights produced on the average 3566 eggs at a cost of 20 cents per dozen in the six months; while the pen without lights produced 3071 eggs at a cost of 22 cents per dozen. This gave an advantage of about 500 eggs for the pen on lights at a reduction in cost of 2 cents per dozen.

During two of the years covered by this experiment the test was continued until October 31, making the average over the whole year, the pen with light laid fewer eggs than the pen without light.

From the figures obtained to date it would appear as though lights have had an effect on the number of eggs laid during the winter months, \$23,555,725.

Macleod Flour

Better Bread - Better Cakes - Better Pies

When the eggs are highest in price, but on the other hand they do not seem to materially alter the total number obtained for the whole year.

FALL PLOWING

(Experimental Farm Notes)
The result of several years' experiments conducted at the Dominion Experiment Station, Lacombe, indicates that 7½ years with the usual amount of precipitation, fall plowing will give as high or higher yields of wheat or oats per acre than spring plowing. In years with more than the average rainfall, fall plowing gives very heavy crops, while spring plowing usually gives better returns than fall plowing in dry seasons, following a very dry autumn.

When the advantages of having the land plowed in the fall are taken into consideration along with the possibility of as high or higher yields per acre, it would seem that farmers living in districts where the Central Alberta would be well advised to do as much fall plowing as possible.

Soil has been broke at different times during the season. The general practice of plowing in the early in June and work as a fall throughout the balance of the season to harvesting, is considered, that when everything is considered, the best method of plowing is produced when soil is ploughed immediately after the rain crop is harvested and the land kept in good condition until the early in June and work as a fall throughout the balance of the season to harvesting, is considered, that when everything is considered, the best method of plowing is produced when soil is ploughed immediately after the rain crop is harvested and the land kept in good condition until the early in June and work as a fall throughout the balance of the season to harvesting, is considered, that when everything is considered, the best method of plowing is produced when soil is ploughed immediately after the rain crop is harvested and the land kept in good condition until the early in June and work as a fall throughout the balance of the season to harvesting, is considered, that when everything is considered, the best method of plowing is produced when soil is ploughed immediately after the rain crop is harvested and the land kept in good condition until the MACLEOD CHORAL SOCIETY FORMED AND OFFICERS ELECTED

Musical enthusiasts of Macleod met in the Town Hall on Wednesday evening, Oct. 9, for the purpose of considering the question of forming a choral society for Macleod. Mrs. Donald White, choir leader and organist of the United Church, was the instigator and responsible for calling the meeting, and the attendance and enthusiasm displayed quite justified her action in doing so. Mrs. White explained her ideas on the forming of such a society and the need for it in Macleod. She also spoke of the class of work which she thought the society should undertake, principally oratorios.

After discussing the matter fully, a resolution was passed unanimously that a choral society be formed, to be called the Macleod Choral Society, to meet weekly in the Town Hall.

Officers were then appointed as follows: President, J. W. McDonald, K. C. Mayor of Macleod, vice president, Sgt. J. W. McDonald, treasurer, Roger Hunt; leader, secretary, conductor, Mrs. Donald White; executive, Mrs. J. P. Keightley, W. J. Ryan, Fred Davis, John Pringle and V. J. E. Gardner.

The town of Macleod has been lost for many years by the want of some one with the ability and training to undertake the work of conducting such a society, and much credit is due to Mrs. White for her enterprise in coming forward to fill a long felt want in the town. There is any amount of talent in the town and district, all it requires is a leader to develop and bring out the talent. It is expected there will be a membership of between fifty and sixty and much pleasure and credit anticipated from the practices, which will be a splendid training for the younger members of the society.

MUNICIPAL DISTRICT OF BRIGHT REGULAR MONTHLY MEETING

The Council of the Municipality of Bright met for the regular monthly meeting on Saturday, Oct. 12, at 8 o'clock, in the absence of the Reeve, J. H. Goss, very little business was transacted. The principal item of the meeting was the presence of a large delegation from the District of Ardernville, who were present to lay their views before the Council in connection with the proposed change of the road on the farm of T. J. Bailey, where a bad bog hole has existed for many years.

The Council at a previous meeting passed a resolution to change the road to a new survey, which was made by the Government Surveyors. There has been a certain amount of opposition to the change of the road and they mustered their forces on Saturday in a delegation to the Council. Those in favour of the change also had their delegation and the forces were about equally divided, about 30 in all being present. R. H. Hackett was the spokesman for those in favour of the change, and W. J. Murphy led the forces against the change.

The Council listened attentively to the arguments for and against, and after due consideration decided to hold a special meeting on Monday first when the full Council with the Reeve would be present and decide the matter.

The Council's present were Messrs. M. A. Keady, Boller, Bailey, Horner, with the Secretary-Treasurer H. W. Wright.

CONSIDERATE

"I want," said the house-hunter, "a house in an isolated position—at least five miles from any other house."

"Sleeping?" asked Miss Cord.

"No," replied the laconic Mr. Cord.

"Haying?"

"Christian Science Monitor."

It's easy to insure your old age against what you will save one dollar a day for 20 years and then come to knock you on the head.

REXALL DRUG STORE AT MACLEOD BROKEN INTO TWO DAYS NIGHT

When Roy Clement, proprietor of the Rexall Drug Store, entered the store on Wednesday morning he found that the store had been visited by burglars during the night. Entrance had been gained by breaking a window at the back, and taking out the whole lot of glass, which is about 2 by 3 feet.

The appearance of the store showed that many drawers had been opened up and searched, the burglars evidently looking for some special articles or goods. The only cash received was about \$745 in small change, the safe not being touched. A considerable quantity of goods of various sorts had been taken, including some drugs and narcotics. A considerable quantity of burnt matches were strewn all over the floor, which would appear that matches were used instead of a flash light. The back door was left standing open and Roy Clement's attention as soon as he entered the store. Both Chief Pringle and Sgt. Vio of the A. P. P. were quickly on the job, but no clues were left by the burglar.

MOUNTAIN VIEW LODGE IN REGULAR SESSION

At the last regular meeting of Mountain View Lodge No. 4, I. O. O. F., the members decided to invest in a Carpet Ball outfit for their hall, which is admirably suited, with the new hall, to give good service to the lodge. The lodge decided to go in for tournaments and games. The members will take advantage of the new hall and will play and compete with the Oddfellows. We understand that the Oddfellows may be the hall and outfit at a nominal fee, so that other organizations may have the advantage of playing, and to make the games more interesting by holding tournaments and tournaments.

The annual meeting of District No. 7, I. O. O. F., is to be held at Staveland on Oct. 16th, and Mrs. Staveland, P. G., was appointed representative. Bro. W. Fleming, P. G., D. G. M., and Secretary W. Whitworth, P. G., will also be present.

DEWITT JOHNSON'S GARAGE NOW UNDER WAY

The foundation for another large garage and service station in Macleod is being put in at present. De Witt Johnson has made a start with his new garage on the corner of 24th Street and 3rd Avenue and from the appearance so far it is going to be quite a fine. The main building will be 60x100, with two offices and rest rooms with all modern conveniences. The building will be stone finish, and will be of an artistic style, giving a nice appearance to that important corner.

This is just another example of the confidence of its business men in the future development of the town and district.

ACCRETIONS

William Allen White was being visited by a New York friend who had not seen him in a year's time.

"Haven't you been getting some additions to your library?" asked the friend, making a joke of White's well-known book making.

"Oh, no," was the calm answer. "I've purchased the neighbors to bring back a few books."—Christian Science Monitor.

DEFINED

Samba: "What are this book million that Ah baah fook talkin' about?"

Rastus: "Yeh sho is ignorant, boy yeh sho is! Why, a millennium am the same as a centennial, only it does hab' mo' legs."—Borcher Cities Star.

FINANCES OF DOMINION HIGH MARK FOR WORLD DESPITE CUT IN TAXES
By Wilfrid Eggleston
Ottawa, Oct. 15.—Canada's balance sheet is the envy of the world. Probably no country can exhibit a healthier state of financial affairs than is shown in the statement for the first six months of the fiscal year, just published by the department of finance.

Canada, in doing three notable things, is reducing her taxes, especially those applying to the average citizen. She is increasing, in face of these tax reductions, her income. She is substantially reducing her funded debt.

For the six-month period just closed she raised her ordinary revenue from \$234,125,239 to \$245,611,226. To do this she had to overcome losses of revenue on the business profits tax, or excise tax, on insurance taxes generally.

Customs duties contributed five millions to the increase in ordinary revenue. Income tax, overwhelmingly paid by the man who can well afford to pay, contributed ten millions to the increase over the corresponding period of last year.

The thirty smile of the minister
